

Project's name: International Seminars Series.

Proponent institution: Coimbra Group of Brazilian Universities (GCUB)

Partner institution: Fatih University

Coordinator in Brazil: Prof. Fábio Furlan

Coordinator in Fatih: Prof. Mustafa Yücel

Area of knowledge: Nanotechnology

Target Audience: nanotechnology experts.

GOAL

a) To promote closer ties between researchers of universities associated with GCUB and researchers abroad in a given area of knowledge of interest for the institutions and priority for governments of the countries involved, with the aim to promote further mutual understanding that will lead to the development of joint action of cooperation, such as:

- Joint research.
- Joint publications.
- Signing of cooperation agreements.
- Exchange of researchers.
- Co-supervision of thesis in co-tutelle regime
- Other suggested actions.

DEVELOPMENT STRATEGY

Date:

- The seminars are annual.
- The seminar lasts from 3 to 4 days.

Place

- The seminars are held alternately one year in Brazil and another in the country of the partner institution.

Methodoly

- Meetings in seminar format, where participants make a presentation on the work they develop in their respective institutions.
- The participants are encouraged to bring and disseminate informative material on work developed they develop in their respective universities
- The conference shall be concluded with a comprehensive discussion encompassing all issues discussed with the aim to o come up with suggestions of joint cooperation actions.
- The concluding discussion shall result in a document containing the guidelines for the development of cooperation activities.

EXPECTED RESULTS

It is of utmost importance that, at the end of the seminar, there are concrete proposals on the possibilities listed above.
